## EDGE MINISCRUB SCRUBBER DRIERS

Miniscrub B10/B15/B15C/B20/B20C

Compact - High Productivity

CE

Maximum Suction Power

The new EDGE Miniscrub Machines are capable of producing a high quality wash, scrub and clean on all types of hard floors and carpets, leaving the floors dry and ready to walk on in minutes. The cylindrical rotating brush is housed within the strong body of the unit that also contains both clean and dirty water tanks. This compact design feature allows the machine to operate in tight and restrictive areas where other machines find it difficult to reach. It also allows the machine to be moved easily from one site to another. The Miniscrub is available in three sizes, B10, B15 and B20 to cope with any cleaning task from the smallest kitchen to supermarkets.

A Square Deal All Round

## Practical - Reliable - Durable

The specially designed brushes can clean any type of floor, be it flat or profiled.

The cleaning solution is fed onto the floor from the clean water tank via a spray-pump, dirty water is then returned to the dirty water tank via a suction pump. The B15C and B20C with Hose Kit can double up as a Spray-Extraction system with a Wand and Cleaning Head.

## User Friendly Operation

Super Markets/Shops and Stores

Schools/Colleges/Universities

Hotels/Conference Centres/Receptions

## Technical Characteristics
