We want to make it easier and a little quieter to clean

Cleaning is hard work. We scrub and brush on all fours, but the question is whether we really got things clean? Around the middle of the last century, an upholstery vacuum cleaner was the height of luxury, whilst high pressure washers were still unheard of.

Since then, things have changed. The task of cleaning has changed radically, thanks to cleaning equipment becoming more efficient and ergonomic. In fact, nowadays cleaning is a lot easier - with equipment which is easy to use and minimises hard work.

That's what Nilfisk can offer, as we have been developing and manufacturing cleaning machinery for around 100 years.

Our range includes dry vacuum cleaners, central vacuum cleaners, wet and dry vacuum cleaners, high pressure washers and steam cleaners, plus a wealth of accessories to make cleaning even easier and a little quieter. Read on for more details!

Our range is divided into 3 product groups

The right product for you is determined on how often you use the pressure washer and also on how tough the dirt is.

Compact
once in a while cleaning

Excellent
regular cleaning

Pro
requent cleaning

Siromer Tractors
